Quality without compromise

Since 1938, Mitra SK has been a name synonymous with Quality Testing. We began with sampling and analysis of minerals and ores in the eastern India's rich mining belt. Over the years our expertise has increased many folds providing reliable, accurate and independent assessment of commodities and materials in several parts of the world. Our services include sampling, supervision and chemical analysis, as well as technical consulting, marine and general surveys. Environment monitoring anlysis and studies is a recent diversification.

Growing global presence

As an independent certifying authority, Mitra SK plays a critical role in international trade. Our team of scientific and technical experts offer testing and supervision facilities across the globe, including countries such as China, Japan, Indonesia, U.A.E and Iran. The objective is to ensure that contractual terms of quality and quantity are fully met. This includes inspection of cargo, weighing and trans-shipment, chemical analysis of samples

and all allied services. Needless to say, Mitra SK certificates are accepted without question by buyers around the world.

Mitra SK's strategic association with international leaders increase our global reach. Our partners ECA, Spain and Nippon Kaiji Kentei, Kyokai of Japan are some of our valuable associates that add an edge to our Asian and European operations.

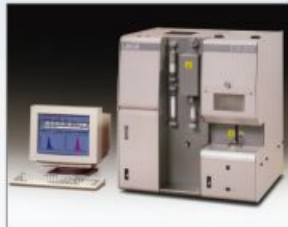

Wherever you are, we are near you !

Services Offered

- Inspection of cargo at mines, collieries, ports and manufacturing centres
- Sampling at various locations and stages of the production process
- Pre-shipment inspection of minerals and commodities
- Draft survey (initial and final) of vessels at loading and discharge ports
- Detailed chemical and physical analysis of samples
- Supervision of loading, discharge, weighing and trans-shipment
- Consulting for production according to contractual specifications

Thrust Areas

Accent on accuracy

Chemical testing is an essential element of any quality process, particularly for minerals and ores. Mitra SK has well equipped laboratories which provide quick and detailed analysis. Continuously upgraded to keep pace with technology, they undertake both classical and instrumental analysis to ascertain conformity with required norms.

Our Central Laboratories is an ISO 17025 & ISO 9001 : 2000 facility equipped with state-of-the-art instruments and equipments providing accurate results and analysis. It is accredited by the National Accreditation Board for Testing and Calibration Laboratories(NABL) and certificates issued by it are recognised worldwide by all ILAC-MRA and APLAC-MRA members.

Mitra SK is accuracy you can trust.

“ In whatever we do we know that our greatest asset is our reputation and integrity. Each day millions of dollars worth of materials are shipped and accepted on our certification. It is quality without compromise. ”
